Accountancy communicates relevant and reliable financial information to different groups of people. Accountants develop financial statements that are released to shareholders, banks, managers and employees within the company, regulatory agencies, taxing authorities, and the general public.

Accounting focuses on financial accounting, managerial accounting, auditing, taxation, and accounting information systems. Accountants measure costs, compare results with planned outcomes, prepare budgets, perform audits and participate in business and tax planning. These responsibilities require high levels of mathematic, computer and analytical skills.

The School of Accountancy at Wichita State is committed to preparing you to become a professional accountant. The bachelor degree in accounting aims to prepare you for the Certified Public Accountants (CPA) exam. You may also consider pursuing other professional certifications such as certificates in Management Accounting (CMA) or Certified Internal Auditor (CIA). The masters in accounting offers two specialized concentrations - Accounting Information Systems and Taxation.
