Keynote Speaker

Amy Reese, Ph.D. is an associate professor of microbiology at St. Louis College of Pharmacy who tries to get students to consider the importance of microbes all around them and to embrace the fun in learning about science. She is well known for doing “interpretive dances” in the classroom in order to demonstrate various concepts. Dr. Reese’s scientific interest is to understand more about the biology of pathogenic or disease-causing fungus. As Amy puts it: “my lab is about studying fungi, having fun, and I try to be a fun gal!”
