The most fulfilled people are the ones who get up every morning and stand for something larger than themselves. They are the people who care about others, who will extend a helping hand to someone in need or will speak up about an injustice when they see it.

Public Health Code of Ethics

Public Health...involves remediation of structural and institutional forms of domination that arise from inequalities related to voice, power, and wealth.

It is difficult for public health to promote health justice at the transactional level if it does not take steps to promote it at the structural and institutional levels as well. –APHA 2019
