RE: Bring Your Own Telescope Night at the Lake Afton Public Observatory.

Learn how to use your telescope

If you have a telescope and haven't quite figured out how to get the most out of it yet -- you are in luck! The Lake Afton Public Observatory and the Kansas Astronomical Observers (KAO) invite you to bring your telescope to the observatory for one more Bring Your Own Telescope evening Friday, Aug. 21. At this event, members of the KAO will be on hand to help you learn how to take full advantage of your telescope's capabilities. Bring your telescope to the table set up outside the front entrance of the observatory where members of the KAO will be waiting to assist you.

KAO members will also have a number of different types of telescopes available for you to look through. So, if you don't have a telescope but are thinking of buying one, you might consider attending this last Bring Your Own Telescope program to get more information about the different types of telescopes available, along with their advantages and disadvantages.

There is no charge for the Bring Your Own Telescope program, however if you would also like to come inside the observatory to look at the Moon through a big telescope, and take in the interesting exhibits, regular admission charges will apply.

Opening Times and Admission

Through the end of August the Lake Afton Public Observatory is open to the public from 9-11 p.m. on Fridays and Saturdays. Observatory admission is \$6 for adults, \$4 for children 6-12 years old, and children under 6 get in for free. There is also a special family rate where two adults and their immediate minor children or grandchildren get in for \$18. Current program information is available from our information line at WSU-STAR (978-7827) or on our website at <http://webs.wichita.edu/lapo> or you can "friend" the Lake Afton Public Observatory on Facebook.

Observatory:
20 mi. SW of downtown Wichita
on MacArthur Rd. at 247th St. W.
(316) 794-8995

Location

The observatory is located about 20 miles southwest of downtown Wichita on MacArthur Road at 247th Street West in Lake Afton County Park. It is immediately north of the lake, just off MacArthur Road. Lake Afton can be reached by any of the following routes: west from Wichita on U.S. 54 to the Lake Afton sign at Viola Road three miles past Goddard, then three miles south and one mile east; or southwest on K-42, 7 miles to Schulte and nine miles west on MacArthur.

The Lake Afton Public Observatory is operated by the Fairmount Center for Science and Mathematics Education, a part of the Fairmount College of Liberal Arts and Sciences at Wichita State University. Additional support is provided by Sedgwick County.
