

Spring 2015 Physics Seminar Series

Wednesdays 2:00 to 3:00 PM, in Jabara Hall room 128

Supported by the Eddy and April Lucas Fund, Wichita Kansas

Jan. 28, 2015	Collisions in an ultracold sodium quantum gas Prof. Arne Schwettmann, The University of Oklahoma
Feb. 11, 2015	Can globular clusters have more than one main sequence? Prof. Jason Ferguson, Wichita State University
Feb. 25, 2015	Dark Energy Search Dr. Douglas Tucker, Fermi National Accelerator Lab, Chicago
March, 11, 2015	TBA
March 25, 2015	Modeling electric energy in a house with renewable and stored energy William Thorne, Wichita State Univ.
April 1, 2015	Dark matter and the DRIFT directional dark matter experiment Prof. John Harton, Colorado State University, Golden
April 15, 2015	Changing Students' Approach to Learning Physics Dr. Calvin Kalman, Prof. of Physics, Principle College of Science, Concordia Univ., Montreal
April 22, 2015	Solar Sail Propulsion Dr. Les Johnson, NASA Marshall Space Flight Center, Huntsville, Alabama
May 6, 2015	Spaces of Quantum Field Theories Dr. Matthew Buican, Rutgers University
