

Out of State Licensure Requirements

Statement on 34 CFR 668.43(a)(5)(v). Wichita State University's teacher education programs are accredited at the national, regional, and state level. Upon completion of all courses and program assessments, graduates of these programs will be eligible to apply for the Kansas initial teaching license for their program of study after they successfully complete the [Kansas teacher licensure exams](#) required by the State of Kansas for application for a teacher license or endorsement. Wichita State has made no determination if this program will lead to licensure in any state other than Kansas in which a graduate may seek licensure. Because every state has different requirements that may change frequently, we recommend checking with the state education department for the state in question to determine current requirements.

The nonprofit organization Education Commission of the States has compiled [Teacher License Reciprocity State Profiles](#) that provide additional information about the teacher license reciprocity agreements for each state in a searchable format. [Kansas Teacher Reciprocity Agreements](#) provides a list of member states of the NASDTEC Interstate Agreement who have signed reciprocity agreements with Kansas.

I have read and am aware of Federal Regulation 34 CFR 668.43 (a)(5)(v) and understand that upon completion of all courses and program assessments, I will be eligible to apply for the Kansas initial teaching license for my program of study after I successfully complete the Kansas teacher licensure exams required by the State of Kansas for application for a teacher license or endorsement in Kansas. I also understand that Wichita State has made **no determination** if this program will lead to licensure in any state other than Kansas.
