

# NASA/WSU Experiential Aeronautics Fellowship

WICHITA STATE  
UNIVERSITY

COLLEGE OF ENGINEERING

Department of  
Aerospace Engineering

## Endorsement Information for AE Faculty

A promising student application for a NASA/WSU Experiential Aeronautics Fellowship (EAF) will include a faculty member endorsement letter.

The letter should be thoughtful and outline proposed collaborative work and specific outcomes. Support a student only if you are truly interested in working with them and you are confident, with proper mentoring, they will grow and be productive.

To address scholarship goals it is imperative for a faculty mentor to:

- Engage the EAF student in high-level NASA-relevant collaborative work; ideally involving intellectual growth, research, and professional activities (e.g., publications)
- A brief annual report, demonstrating the student and faculty mentor are collaborating and doing worthy things is expected.

Additional information on the NASA/WSU Experiential Aeronautics Fellowship (EAF) and the student application process is available on the AE webpage.

A WSU committee will review and score submissions. The endorsement letter, and its content, are considered within the evaluations. Selection is competitive, based on the scholarship goals and guidelines.

The endorsement letter can be emailed directly to [NASAINKansas@wichita.edu](mailto:NASAINKansas@wichita.edu) or shared with the student who will submit it with their application.
