WHAT IS RADON?

Radon is a radioactive gas that occurs naturally in soil. It enters your home through cracks in concrete floors, walls, floor drains and sump pits.

As you breathe, the radon gas can release tiny bursts of energy that can damage living lung tissue and can lead to lung cancer over time.

NEARLY 1 IN 15 U.S. HOMES TESTS HIGH FOR RADON

IF YOU SMOKE AND YOUR HOME HAS HIGH RADON LEVELS, YOUR RISK OF LUNG CANCER IS HIGHER

TEST YOUR HOME

Testing is the only way to know if your family is at risk from radon. Testing is inexpensive and easy.

Order a test kit at www.sosradon.org
