Kansas Asset Management Users Group (AMUG) Meeting  
November 30, 2018        10am – 2p  
City of Topeka Water Treatment Plant  
3245 NW Water Works Drive   |   Topeka KS

AMUG PURPOSE
To continue to provide professional development to water and wastewater professionals to further the implementation of asset management concepts through networking with other systems and content experts.

MEETING THEME
Inventory and Condition Assessment & Criticality

AGENDA

10:00   Welcome & Introductions

10:10   Turning Up the Heat on Water Main Breaks
Find out how Topeka identified assets and determined replacement costs, and is now digging deep to determine condition, age of installation, and breakage history to develop break tracker heat maps that will guide future maintenance and spending.  
_TSG Group, City of Topeka_

11:10   Sanitary Sewer Lining and Rehabilitation
We will discuss the City of Topeka’s program to develop condition assessment of the collection system using contracted CCTV services, the initial lining project and the selection of future lining and rehabilitation projects based on consequence and probability of failure.  
_Wastewater Engineer, City of Topeka_

11:30   BREAK – Lunch Provided

12:00   Facility Tour
_Braxton Copley, Deputy Director of Utilities, City of Topeka_

12:45   Looking into the Treatment Plant Crystal Ball
Topeka’s Water Treatment Plant has taken steps that allow them to catch a glimpse into the crystal ball. High risk and consequence of failure assets have been identified through a major condition assessment project with Black and Veatch.  
_Black and Veatch_

1:45   Updates and Resource Sharing
Enjoy Your Weekend!
