https://www.math.wichita.edu/skday

Sponsored by The Department of Mathematics, Statistics and Physics; The Fairmount College of Liberal Arts and Sciences; and Emprise Bank

Sonia Kovalevsky was a Russian mathematician who made noteworthy contributions to analysis, partial differential equations and mechanics. She was a pioneer for women in mathematics around the world – the first woman to obtain a doctorate (in the modern sense) in mathematics, the first woman appointed to a full professorship in Northern Europe and one of the first women to work for a scientific journal as an editor.
