# The General Education Committee Review of Student Learning Outcomes, AY 2014-2015

**Process:**
- In the fall semester, the General Education Committee gathers and assesses the data that has accumulated since the last review (i.e., learning outcomes, changes) and writes a report to the Faculty Senate.
- In the spring semester, the report with any recommendations for change is presented to the senate early in the semester so that the senate has the time for thorough consideration prior to taking the recommendations to the general faculty later in the semester.
- Any changes approved by the faculty (e.g., to the general education program) will be instituted in the following version of the undergraduate catalog

**Activities:**
- Activities for AY:
    - Reviewed feedback from the General Education forum (fall 2013). This feedback indicated a more robust WSU 101 course (the primary FYE course for first-year freshmen) was needed.
        - In response to the Forum feedback and a recommendation by the University Retention Council to phase out WSU 101, the Committee (after consultation with the Faculty Senate Executive Committee) began work on a proposal to replace WSU 101 starting in AY 2016-2017 with a Freshmen Seminar course concept. The proposal will be finalized fall 2015 for Faculty Senate consideration.
    - Identified two spring courses, PHIL 144 (Moral Issues) and BIOL 309 (Foundations of Human Heredity), for the writing rubric assessment project.
        - Data for these courses will not be available for review until next academic year, as data collection is still in progress.
    - Reviewed student learning performance dashboard data for overall student learning outcomes (page 2).
- Summary of information/data reviewed:
    - Student Learning Performance dashboard for overall student learning outcomes.
        - In terms of direct measurements for student learning, students were performing "at" expectations on the CLA and above expectations on the English 101 writing performance assessment. Likewise, indirect measures indicate continued success in student perception in their critical thinking abilities, oral/written competency, and teamwork competency. Students continue to perceive their chosen degree will be useful to them in their career and 84.3% of them are employed within 6 months of graduation.
        - Some NSSE outcomes were lower than previous years, however, the survey changed in 2013 making it difficult to know whether a change in survey or some other factor caused the decrease. NSSE was administered spring 2015. Data will not be available for review until next academic year.

**Recommendations for next academic year**:
- Complete the freshmen seminar proposal for Faculty Senate consideration.
- Continue writing rubric assessment projects among general education courses. Recruit more faculties who teach courses across the disciplines.
- Continue to monitor the overall outcomes of student learning for potential changes to the general education program, as students are currently performing "at" expectations.
