

Health Management Major

Bachelor of Science

Introduction To The Degree

The Bachelor of Science in Health Management offers a pathway into entry and mid-level management careers in a hospital, long-term care facility or public health organization and serves as a foundation for success in graduate education in health administration, public health, or aging studies.

Through this program students may select a major, minor, honors option, or certificate to gain a broad view of the healthcare delivery system and healthcare management practices. Program graduates find rewarding career in a variety of settings including hospitals, nursing homes, group medical practices, personal care homes, retirement centers, health maintenance organizations, medical sales, insurance companies, health departments, mental health organizations, public agencies, and many other types of healthcare organizations.

Reasons To Study Health Management at Wichita State

1. Careers in healthcare are the fastest growing occupations
2. Working in healthcare is meaningful and rewarding
3. Health Management degrees prepares students for multiple clinical programs
4. Our faculty want students to succeed
5. Our program is the most affordable in Kansas

Program Highlights

Aging Studies prepares students for many entry level positions in senior living communities and aging organizations and prepares students for graduate education in aging studies.

Business equips students with fundamental business skills tailored to the healthcare industry, focusing on key areas such as finance, marketing and organizational management. It also lays a solid foundation for graduate education in healthcare administration.

Public Health prepares students for a variety of entry level positions in state and local health departments or health-related organizations and graduate education in public health.

Healthcare Operations prepares students for a variety of entry level management positions in clinical health care organizations and graduate education in health administration.

Health Science prepares students for a variety of professional healthcare positions providing clinical, laboratory and sales support through government, academic and private organizations.

Fill Your Portfolio

Students must collect 10 points to fill their portfolio. Evidence of completion includes “artifacts” and written entry for each activity. Artifact examples include:

- Pictures while involved in the activity
- Documentation by the activity directors (i.e., volunteer coordinator, manager, etc.)
- Completed course assignments
- Certificates of completion
- Email confirmations

Written entry for each activity is to be approximately 250 words and must demonstrate the connection between the activity and at minimum one (1) of the Health Management program learning outcomes below:

- Foundational Clinical Knowledge:**
apply a broad- based understanding of biological, medical, and social knowledge to solve healthcare issues
- Evidence-Based Practice:**
demonstrate skill in using data to analyze and improve health outcomes
- Health Administration:**
understand U.S. healthcare system deliver, management, and operations
- Public Health and Education:**
understand the protection, promotion, and assurance of population health outcomes
- Equity and Ethics:**
demonstrate commitment to culturally informed healthcare ethics and equity
- Interprofessionalism:**
demonstrate commitment to communication cooperation, professionalism, and person-centered care
