

Associate of Arts Pre-Dental Hygiene

Online Bachelor of Science in Health Management

Advance Your Healthcare Career with a Bachelor of Science in Health Management (BSHM)

A Bachelor of Science in Health Management (BSHM) paired with expertise in cybersecurity offers a powerful combination for careers in medical IT. As healthcare organizations increasingly depend on digital systems for patient records, data analytics, and operational efficiency, the demand for secure and effective information systems has surged.

Health management professionals with cybersecurity knowledge are uniquely equipped to protect sensitive health data, ensure regulatory compliance, and develop secure IT strategies. This skill set opens doors to roles such as health information security analyst, IT project manager in healthcare, and medical data privacy specialist—all in high demand as the healthcare technology field grows.

According to the U.S. Bureau of Labor Statistics, medical and health services managers earn a median salary of \$110,680, with a 29% job growth projected by 2033. Information security analysts earn \$112,000, with 35% growth (BLS, 2022). Combining these fields positions graduates to lead in healthcare operations while protecting valuable data, responding to the growing demand for secure healthcare systems.

HutchCC Pre-Dental Hygiene Required Courses

Year One Taken @ Hutch CC - 30 Credit Hours

EN 101 English Composition IA	3	EN 102 English Composition II	3

100% Online Bachelor of Science in Health Management (BSHM)

The BSHM program prepares graduates for leadership roles in healthcare and serves as a strong foundation for advanced studies in health administration, public health, or aging studies. Students can specialize in aging services, senior living, healthcare operations, health science, or public health, tailoring their education to build industry-relevant skills. Taught by experienced faculty and healthcare professionals, the program provides practical knowledge for success in the evolving healthcare landscape.

Complete the program 100% online with in-state tuition or choose a hybrid format with in-person learning. Flexible options help students balance work, school, and life while advancing their healthcare careers.
