Basic PDF Remediation for Accessibility

Presentation by Jeremy Webster

ARC2020

1. Pre-Remediation Considerations

Can it be built as a webpage instead?

- Webpages handle a great amount of accessibility issues automatically, requiring far less effort
- OU Campus features a robust accessibility scanner, and the MRC Web Team is happy to assist with webpage-based accessibility issues

Was it made accessible in its source application?

 Documents made accessible in their source applications (examples: MS Word and PowerPoint, Adobe InDesign) will typically carry over most, if not all, of their accessibility when exported to PDF

2. Obtaining Adobe Acrobat Pro DC

Adobe Acrobat Pro DC is required for PDF accessibility remediation

- Acrobat Pro DC is available to WSU Faculty and Staff
- If you do not currently have Acrobat Pro DC submit a request for Adobe Creative Cloud to <u>helpdesk@wichita.edu</u>
- The Adobe Creative Cloud service allows users to download and utilize a large variety of Adobe applications
- Helpdesk will provide instructions on accessing and downloading the applications

3a. Setting Up Acrobat Pro DC

Once you have Acrobat Pro DC, you will need to add a number of tools to both the left and right tool panes.

These panes can be opened and closed by clicking on the arrows in the center of each.

3b. Setting Up Acrobat Pro DC

To add tools to the right pane, click the "Tools" tab in the upper left corner.

		Links are pla	aced in a "Link" Ta	g directly under	the "P" Tag in whic	h the link "lives."	lt is				
		structured r	nuch like a form f	ield.							

3c. Setting Up Acrobat Pro DC

To add a tool, click the "Add" button below its icon. Add the following tools:

- Scan & OCR
- Fill & Sign
- Prepare Form
- Accessibility
- Action Wizard

Exit the tool tab by clicking any right pane tool button

3d. Setting Up Acrobat Pro DC

To add tools to the left pane, first open the pane

Right-clicking on the pane will show all available tools – select the following:

- Content
- Order
- Tags 属

OCR (Optical Character Recognition) Section 4

4a. OCR (Optical Character Recognition)

If a PDF is a scan of a physical copy rather than a digitallycreated document, the OCR tool is necessary to recognize text

- Before OCR is used, all text in the document is technically simply part of a single image
- OCR searches through this image for things that are likely text characters and marks them as such
- The cleaner the scan, the better OCR will be able to recognize what is and is not text in the document

4b. OCR (Optical Character Recognition)

JPG_Basic_PDF_Practice_File_Page_1.pdf Open the right tool pane ? Home Tools Basic_PDF_Practi.. Microsoft Word -. Tag Structures in. JPG_Basic_PDF_... × B 🕁 🖓 🖶 🔍 K- (\uparrow) cm) \ominus (+)2 🖂 🎍 1 / 1 124% 🔻 Select the "Scan & OCR" Search tools tool Create PDF WICHITA STATE UNIVERSITY Combine Files Edit PDF Export PDF **Basic PDF Remediation** Organize Pages Although PDFs have become a convenient alternative to other document types, they present Send for Comme... their own special challenges when it comes to remediation for Accessibility. However, once you Scan & OCR <u>bave adde</u>d the proper tools to Adobe Acrobat Pro DC, you can be well on your way to E Comment 📿 Fill & Sign Tags 💾 Scan & OCR Tags are used to group certain types of content in a PDF. Think of a tag as a sort of screen Protect reader billboard on a selection of content. The tag will tell the screen reader how to handle the Accessibility content in the overall document. There are many types of tags, but some of those you will most commonly use are presented below. Action Wizard **Commonly Used Tags** Your current plan is Creative Cloud 1. Paragraph Learn More 2. List 3 List Item

4c. OCR (Optical Character Recognition)

The "Scan & OCR" Toolbar will show toward the top of the window

Click the "Recognize Text" dropdown button on the toolbar

AA Recognize Text -

4d. OCR (Optical Character Recognition)

ARC2020

4e. OCR (Optical Character Recognition)

A secondary toolbar with more nuanced options will open. Select the "Recognize Text" button on this toolbar to launch OCR.

Recognize Text

4f. OCR (Optical Character Recognition)

The secondary toolbar will disappear when OCR completes

Re-open the "Recognize Text" dropdown and select "Correct Recognized Text."

4g. OCR (Optical Character Recognition)

In a new secondary toolbar OCR will go one-by-one through any items it found questionable. The image of the item as it appears in the document will appear at the left. OCR's "recognized" attempt at recognizing the item will appear in a field at the right

- If OCR's guess was correct, click the "Accept" button to continue to the next item, if there are any
- If OCR's guess is incorrect, type the correction in the "recognized field" and click the "Accept" button
- If the item is not actually text, delete anything in the "recognized as" field. This will change the field to read, "this is not text." Click "Accept" to proceed.
- Upon completion of this process the PDF is ready for tagging. Be sure to save the PDF in its current state

5a. Checking PDF Accessibility

To run an accessibility check on a PDF, we will first have to enter the accessibility toolset

Select the "Accessibility" tab in the right tool pane

Accessibility

5b. Checking PDF Accessibility

The Accessibility toolset will now be open Select "Full check" in the Accessibility toolset

Full Check

5c. Checking PDF Accessibility

The "Accessibility Checker Options" dialogue box will open

Make sure all Checkable Options are selected

Select "Start Checking" in the bottom right corner

Start Checking

All items should be selected

5d. Checking PDF Accessibility

Results of the scan will show in the left pane

5e. Checking PDF Accessibility

Results can be seen under a series of topic headings – "Document," "Page Content," etc.

If there are accessibility issues, the topic heading will state how many

Click the arrow to the left of each topic to expand the list of issues

5f. Checking PDF Accessibility

A green checkmark means that the subtopic has cleared the check with no issues

A white X in a red circle means that the subtopic has issues that need to be repaired

A white question mark in a blue circle indicates that the checker cannot determine whether the subtopic passes or not – a person has to do a manual check to make sure the topic is in compliance

5g. Checking PDF Accessibility

A yellow triangle with an exclamation mark in it typically indicates a subtopic that the system was not able to check because the element on the page (in this case a table) has not been constructed in such a way to allow it

In this case, there is a table in the document but, since the content that makes up the table hasn't been properly tagged as such, the system cannot perform this check

5h. Checking PDF Accessibility

Some subtopics can be further expanded to look at individual occurrences of an issue

In this example, three figures or images – called "elements" – do not have proper alternative text

Selecting each element will highlight it in the document

Right clicking each element opens a menu by which the element can be repaired

5i. Checking PDF Accessibility

Many PDFs will report errors for Primary Language, Title, or both

Both can be easily fixed by right clicking on the topic, selecting "Fix," and, if an additional option box opens, simply selecting or supplying the answer

5j. Checking PDF Accessibility

A PDF may pass the checker but still not be accessible

- For example, the system cannot determine if reading order or color contrast is accessible – the document creator(s) and/or editor(s) must check these for themselves
- <u>Do not assume a PDF is accessible even if it says it is</u> always take a look at the tags and reading order to make sure everything is as it should be

6a. An Introduction to Tags

What are tags?

 As Adobe themselves put it, "Tagging is essential for PDF accessibility. Tags establish logical reading order and provide a means for indicating structure and type, adding alternative text descriptions to non text elements, and substitute text (referred to as actual text) for elements in the PDF document."

Tags are used to indicate two things in a PDF:

- The existence of content
- The type of content (Heading, Paragraph, List, Table, Figure, etc.)

Most of the work necessary to remediate a PDF will normally be done with tags

6b. An Introduction to Tags

П

B

Ø

Ē

To access the tags view:

- Open the left side tool pane
- Select the Tags button

6c. An Introduction to Tags

As we can see here, this PDF does not have any tags – the document will have to be tagged as part of the process of making it accessible

Depending on the source of a document, it may have tags and it may not – documents should be checked for tags beforehand

It may be necessary to delete tags and retag a document to make it accessible

6d. An Introduction to Tags

There are two methods of tagging a document – Autotagging and Manual Tagging

- <u>Autotagging</u> is generally a significant time saver the system will automatically look for and tag all content in a document to the best of its ability
- There will usually be corrections needed afterwards via manual tagging
- <u>Manual Tagging</u> involves using the Reading Order tool to manually select content and tag it
- Is usually more exact than Autotagging, but takes far longer to do
- The easiest, most time-efficient answer is usually Autotagging the entire document, then use Manual Tagging to clean it up

6e. An Introduction to Tags

To Autotag our document, first select the "Accessibility" tab on the right tool pane

8

Microsoft Word - Basic PDF Sample.docx

6f. An Introduction to Tags

.

Select the "Autotag Document" tab at the top of the Accessibility tool pane

6i. An Introduction to Tags

We can now see our first tags in the document.

- The "Figure" tag is the WSU Letterhead graphic at the top of the page.
- The "Part" tag contains the rest of the document's tags.
- Tags frequently subset within other tags - To access the tags within a tag, click the arrow to the left to expand the view.

6j. An Introduction to Tags

Here we can see an expanded view of the tags in the document.

- The Figure/Image is the WSU Letterhead logo, which we will need to either apply alternative text to or render as background/artifact
- Under the Part tag we have the document title (<H2>), the following paragraph (<P>), and three <Sect> tags in which are tags for other sections of the document
- <Part> and <Sect> tags are organizational they help the creator/editor keep the tags in useful, orderly groups and do not effect the document's accessibility.

6k. An Introduction to Tags

Some commonly used tag types include:

61. An Introduction to Tags

Some common tag structure examples include:

6m. An Introduction to Tags

For a thorough look at working with tags in PDFs, please visit the PDF Remediation for Accessibility webpage at https://wichita/edu/pdfhelp

You will find:

- Instructional videos that will guide you through the complete remediation of two PDFs
- Download links for unremediated versions of both documents so you can work along with the video or practice on your own
- Download links for remediated versions of both documents you can use to compare your work with or use as references for using various tags and techniques

7a. Checking Reading Order

Once tag work has been completed it's time to check Reading Order

- Reading order is, quite literally, the order in which content will be presented to the screen reader user
- This is NOT adjusted by rearrangement of tags Reading Order has to be set on its own
- While tag work will not change Reading Order, working in Reading Order CAN affect tags, particularly subset items in tables and lists
- PDFs with tables and lists may need a number of back-and-forth visits between Tags and Reading Lists to fully complete remediation

7b. Checking Reading Order

Select the "Order" tab in the left tool pane

z

7c. Checking Reading Order

The left pane will show a numbered itemby-item list of the content in the PDF.

- When reading order is displayed, all tags in the document will be shown on the page
- Select an item in the list and use the arrow keys to proceed through the document's reading order
- The numbers in the reading order list correspond to the numbers in the top left of every tag
- To move an item in the reading order, left click and drag it to its intended location
