

JCCC and the future of Technical Education

Apprenticeships and the new Hugh L Libby Career
& Technical Education Center

Richard Fort

Dean of Industrial Technology

John Littleton

Program Director, Continuing Education

Workforce

“We need more skilled labor!”

-Industry

There were [7.2 million job openings in July](#), making it the 17th consecutive month that there were more openings than job seekers according to new data from the Bureau of Labor Statistics this week.

—US Dept. of Labor, September 13, 2019

More than half of the current workforce in skilled trades occupations will need to be replaced over the next five years. —MARC, 2019

So what are we doing about the gap?!

Fulfilling our mission by Occupational Preparation and Training

- More than 50 one and two-year career degree and certificate programs prepare students to enter the job market in high-demand fields.
- Meet immediate needs through Continuing Education to bring needed training to the client, either on-campus or onsite, on their time. Delivering, what is needed, when it's needed and where.

Fulfilling our mission by Occupational Preparation and Training

- Establish Center of Excellence for Career & Tech Education with a \$27Million investment with purpose built tech center; The Hugh L Libby Career & Technical Education Center.
- **Apprenticeships that matter!** JCCC understands that we need to reach students where they are in their career path and is partnering with companies to make this happen.

JCCC Apprenticeships

- To date we have agreement to deliver Electrician Apprenticeship and are working on the submission of Industrial Mechanic and Technician, IT and possibly CDL programs in the near future.
- JCCC has a Welding Apprenticeship program approved and will be launching that program in the fall of 2020 to coincide with the opening of our new welding labs.
- Apprenticeships along with other continuing education and credit programs offers our students and our business partners the flexibility to generate the knowledgeable employees they need today and in the future.
